

MARYMEDE BASKETBALL CLUB

INJURY POLICY

Injury Incident Policy

The Marymede Basketball Club Injury Incident Policy covers all Players, Coaches, Committee and members of the club participating in games, training and/or club duties and across all stadiums.

The club requires all injuries to be reported and subsequently recorded in the Injuries Register in the case a medical practitioner and insurance companies need further information.

- All injuries must be communicated to the club as soon as physically possible.
- Members are required to complete a **Club Injury Report** and forward to the club either via the teams Team Manager or via email to **registrations@marymedebasketballclub.com.au**.
- Injuries may include but are not limited to serious cuts or abrasions, soft tissue injuries and broken or fractured bones.
- If an injury is sustained **during** a game, the stadium supervisor should be notified and a **Stadium Injury Report** completed (as well as the incident report for the club). Both reports are essential in order to be able to claim out of pocket expenses through the sport insurance that the association offers and is included as part of your child's registration.
- If the injury is long term in nature, a **medical certificate/letter is required detailing the injury and the length/period what the child cannot play**. This will ensure that the child qualifies to play should the team make it to finals.
- If child sustains an injury **outside** of specified club activities, this should also be reported to the club with a certificate/letter attached. Again this will ensure that the child qualifies to play should the team make it to finals. A Club Incident Report is not required in these circumstances.
- The clubs Registrations Officer is responsible for ensuring that the Clubs Injury Register is completed and up to date. It is also his/hers responsibility to ensure that all documentation provided relating to an injury is securely stored.
- It is also the responsibility of the clubs Registrations Officer to notify the respective association of any long term injuries and submit relevant medical certificates/letters to support the injury.
